Walk Test Mode – AU5000 Series Panel
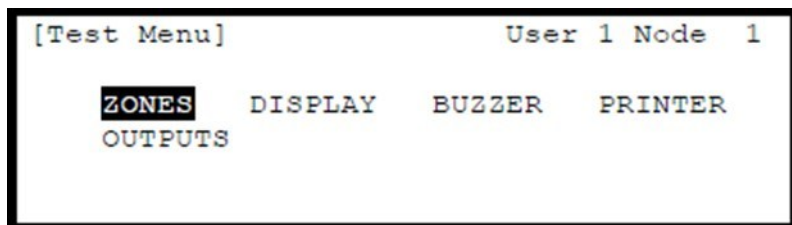

Use Walk Test Mode to verify detector and sounder functionality without triggering a full fire alarm. Ideal for maintenance and commissioning checks.
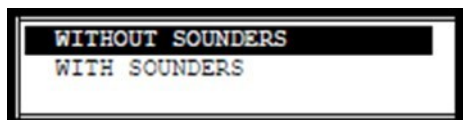

Steps to Enter Walk Test Mode

1. Access the Test Menu

- Press the **MENU** button on the panel.
- If you're in **Level 2 mode**, highlight **TEST** and press ✓
- If you're in **Commissioning mode (Level 3)**, press **NEXT MENU** twice ➔ then select **TEST**.

2. Select Zones for Testing

- Under the Test Menu, select **ZONES**.
- A pop-up will ask whether to **enable sounders** for ~10 seconds when a device is triggered.
- Choose your preferred option, then press ✓

***TIP:** Before testing, check how the sounders are programmed to respond in Test Mode to ensure expected results.*

3. Add Zones to Walk Test

- Use the arrow ⬆ / ⬇ buttons to scroll and highlight the **zones** you want to test.
- Press ✓ to activate Walk Test mode for each selected zone.
- *(You can select multiple zones if needed.)*

```
[   1 Zone in Test ]
Zone      Test State    Location
0001      IN TEST       BASEMENT WEST
0002      -             BASEMENT EAST
0008      -             GROUND FLOOR
0009      -             MAIN RECEPTION AREA
```

> **Note**: *During Walk Test Mode:*

⚠ Alarm Verification Function (AVF) and delay features are automatically **disabled**.

⚠ Fire Alarm Relays (e.g. to Alarm Signaling Equipment) will **still operate**.
4. Begin Testing Devices

- Once activated, the **"IN TEST"** LED will illuminate on the panel.
- Trigger devices (e.g. smoke detectors, MCPs).
- The panel will display **"FIRE"** when a test signal is detected.
- Once the device resets, the panel automatically clears the test condition.

```
[   1 Zone in Test ]
Zone      Test State    Location
0001      IN TEST FIRE  BASEMENT WEST
0002      -             BASEMENT EAST
0008      -             GROUND FLOOR
0009      -             MAIN RECEPTION AREA
```

⚠ *If you're testing more than 40 devices:* Exit and re-enter Walk Test Mode after 40 devices have been tested (this is the max per session).

5. Exit Walk Test Mode

- When testing is complete, highlight the zones still in Walk Test mode.
- Press ✓ to remove them from test state.

6. View Tested Devices (Optional)

- To confirm which devices were tested:
- Go to **VIEW ➔ LOG ➔ ALL EVENTS**.
- Use the ⬆ / ⬇ arrows to scroll through recent system events.
